

C#FRONT

E Foqus 2006

Can you access Navision from a .NET Application?

Not a problem with C#FRONT from E Foqus Danmark A/S

C#FRONT is a .NET component that exposes Navision database access through C/Front as a regular .NET Class.

Add the class to your .NET application (C# / VB.NET / J# / C++ Managed) and you have full access to Navision.

Highlights

- Real .NET Class with all functions from C/Front
- Select between native and SQL C/Front classes.
- Auto conversion between .NET data types and Navision fields.
- Full support for the Navision character-set (Unicode to codepage 850 conversion)

Price

.NET DLL: 5.000 DKK (pr. Developer)
Source (C#): 15.000 DKK (Unlimited developers)

Release Februar 2004

IN SHORT

Advantages:

- Real .NET Class with all functions from C/Front
- Select between native and SQL C/Front classes.
- Auto conversion between .NET data types and Navision fields.
- Full support for the Navision character-set (Unicode to codepage 850 conversion)
